

# XSB-563T Tripod Turnstile

## Efficient, Durable, and Compact Access Control Solution

The XSB-563T Tripod Turnstile is a space-efficient security barrier designed for effective entrance management. Its compact design integrates seamlessly with third-party access control systems, offering bi-directional operation and exceptional anti-tailgate performance. Its modular structure ensures ease of maintenance, making it a cost-effective and reliable solution for indoor and outdoor use.

### Key Feature

Durable Material:	Constructed with SUS304 stainless steel for enhanced durability, with optional SUS316 for increased corrosion resistance.
Bi-Directional Functionality:	Supports both entry and exit operations with an arm drop feature for emergencies.
Weatherproof Design:	Fully waterproof, ideal for outdoor installations.
Improved Mechanism:	Advanced block arm design minimizes wear and extends the lifecycle.
User-Friendly Configuration:	Adjustable timeout delays and easy DIP switch settings for quick setup.
LED Indicators:	Provides clear operational status for users.

### Emergency Escape Function

The arm drop mechanism allows for safe and quick clearance in emergencies.

### Seamless Integration

Works effortlessly with RFID, biometric systems, and other advanced access control devices.

### Noise Reduction Design

Operates quietly, making it ideal for environments requiring minimal noise disturbance.

### Energy Efficiency

Designed for low power consumption, suitable for continuous use in high-traffic areas.

### Durable Build

Enhanced arm mechanism reduces wear, ensuring long-term reliability.

### Ease of Maintenance

Modular construction simplifies repairs and system upgrades.

### Flat and solid Lid

- Easy to integrate third party access control device, especially the latest face recognition device
- Total water proof design, the device can work outdoor directly

### Solid two legs with girde

- The Device can be easily and strongly fixed onto the ground
- When Testing the device, it is convenient to make all the operation without falling down

### Improved Block Arm

- The mechanism of the block arm use improved design, avoiding wearing between the block arm and rotation plate, increase life cycle
- The gap between block arm and rotation plate is small

### Reliable and Powerful Board

- Fast and easy setting by DIP switch
- Relay output for rotation confirm function
- Small LED show the status of the device clearly
- Testing keypad on board

### Weatherproof Build

Fully sealed design ensures reliable performance in both indoor and outdoor settings.

## Dimension

## Application

- Office Buildings: Streamlines access for employees and visitors.
- Public Transportation: Efficiently manages passenger flow in metro stations and airports.
- Educational Institutions: Provides secure and controlled access for students and staff.
- Commercial Spaces: Ideal for malls, retail stores, and business complexes.

## Specification

Model Number:	XSB-563T
Power Requirements:	AC110V/220V, 50/60Hz
Working Temperature:	-28°C to 60°C
Working Environment:	Indoor/Outdoor
Lane Width:	550mm
Material (Cabinet):	SUS304 Stainless Steel
Barrier Movement:	Rotation
Security Level:	Medium
LED Indicator:	Yes
