

XG-80KP02

Wired Touch Keypad

Overview

The XG-80KP02 Wired Touch Keypad offers a modern and secure solution for controlling alarm systems in homes and businesses. With its sleek design, intuitive touch interface, and multiple control methods, it delivers enhanced functionality for security-conscious users.

Whether you're managing access to your property or monitoring security zones, the XG-80KP02 ensures that every interaction is seamless and straightforward.

Key Feature

Touch-sensitive Keypad:	Ensures smooth and accurate input for arming/disarming the alarm system.
LCD Display:	Provides real-time status updates and settings visibility, even in low light.
Wired Connectivity :	Stable, reliable communication with alarm control panel and sensors.
APP Control:	Compatible with smartphone apps, allowing remote control and monitoring.
Alarm Notifications:	Supports SMS and PSTN-based alarm notifications, as well as app alerts for instant notifications.
Security Integration:	Customizable settings allow for integration with various alarm systems.

Modern Design

The XG-80KP02 Wired Touch Keypad features a sleek and stylish design that enhances the aesthetic appeal of any home or business security system.

Touch Interface

This intuitive touch interface keypad allows for easy, responsive operation and quick access to security controls, enabling users to manage alarm systems with ease and precision.
