

# XR-8WS01

## Wireless Mini Siren

## Overview

The XR-8WS01 Wireless Mini Siren is a versatile alarm device designed to provide audible and visual alerts in the event of an intrusion or emergency. Equipped with a sound alarm and flashlight, it communicates wirelessly with control panels and other security devices.

This siren is suitable for security systems, utilizing adapter power and a backup battery for reliability. It includes tamper protection and enables two-way communication with controllers and sensors.

## Key Feature

Sound and Flashlight Alerts:	Combines an audible alarm with a flashing light to provide a clear indication of security breaches.
Wireless Communication:	Communicates wirelessly with security control panels and sensors, ensuring seamless integration into alarm systems.
2-Way Transmitter and Receiver:	Equipped with a two-way communication system, it allows for both alarm triggering and status confirmation, such as disarming.
Power Supply:	Powered by an external adapter with a built-in standby battery, ensuring continuous operation even during power outages.
Tamper Protection:	Features tamper detection to alert the system if the siren is interfered with, adding an extra layer of security.
Device Compatibility:	Can be paired with remote controllers, magnetic switches, emergency buttons, and other wireless security devices, offering flexible alarm configurations.

## Application

### Home & Business Security:

- Provides alarm functions for homes, offices, and businesses, working with various wireless sensors to create a comprehensive security system.

### Alarm System Integration:

- Can be integrated with control panels, remote controllers, magnetic switches, emergency buttons, and more to enhance security capabilities.

## Specification

Model Number:	XR-8WS01
Alarm Type:	Sound and flashlight
Wireless Compatibility:	Compatible with same-brand Focus security systems
Power Source:	Powered by an adapter and includes a standby battery
Wireless Range:	Communicates wirelessly with control panels and connected devices.
Enrollment Capacity:	Can enroll up to 48 wireless devices
Working Mode:	2-way transmitter and receiver
Tamper Function:	Alerts the system if tampered with
