

# XG-WS011

## Wireless Outdoor Siren

### Overview

The XG-WS011 is a robust and highly customizable outdoor siren designed to serve as a powerful deterrent for intruders while enhancing the reliability of any wireless or wired security system. With a loud 120dB strobe light alarm, this unit delivers immediate audio-visual alerts in case of security breaches. It supports 4 alarm tones, adjustable volume levels, and multiple alarm duration settings—offering flexible alert customization to suit diverse environments.

The siren is equipped with a built-in 5000mAh lithium battery and supports solar charging (optional), ensuring continuous outdoor operation.

### Key Feature

High-Powered Alarm:	120dB sound with integrated strobe light
---------------------	--

Wireless/Wired Compatibility:	Can be used in either configuration
-------------------------------	-------------------------------------

Customizable Settings:	Adjustable volume (4 levels), tones (4 options), and alarm durations
------------------------	--

Built-in Battery:	3.7V / 5000mAh lithium for continuous operation
-------------------	---

Solar Charging Option:	Supports optional solar panel for eco-friendly power
------------------------	--

Remote Control Support:	Operates with up to 20 remote controls
-------------------------	--

### Application

The XG-WS011 is perfect for residential properties, gated communities, offices, shops, warehouses, and industrial facilities. It provides robust outdoor intrusion alerts and signaling, ideal for security-critical outdoor areas requiring high-visibility and high-volume alerts.

### Specification

Model Number:	XG-WS011
Input Voltage:	DC 6V–12V
Battery:	Built-in 3.7V / 5000mAh lithium battery
Alarm Output:	120dB with strobe light
Volume:	Adjustable (4 levels)
Alarm Tones:	4 options
Alarm Duration:	4 selectable durations
Configuration:	Wireless / Wired
Remote Support:	Up to 20 remotes
Solar Charging:	Optional panel supported
Product Size:	270 × 180 × 47 mm
