## Wired Outdoor Siren with Flashlight

### Overview

The XG-80S02 Outdoor Siren with Flashlight is a reliable and efficient alarm device designed to work seamlessly with various security systems. It offers loud sound alerts combined with a flashing light, making it a strong deterrent against intruders and an effective way to alert occupants of any security breach.

Its robust construction ensures durability even in harsh weather conditions, while its sleek, modern design allows it to blend unobtrusively with different architectural styles. Easy to install and maintain, the XG-80S02 is equipped with advanced technology to minimize false alarms and maximize response accuracy.

### Key Feature

Loud Audible Alert:	Emits a powerful sound pressure of $108\pm 3$ dB at 30cm, ensuring that the alarm is heard clearly from a distance.
Integrated Visual Alert:	Equipped with a bright flashlight that enhances the visibility of the alarm, especially in low-light conditions.
Wide Voltage Range:	Operates efficiently within a voltage range of 9-15VDC, making it adaptable to various power sources.
Durable Construction:	The siren is housed in an ABS fireproof case, providing protection against harsh weather conditions and ensuring long-term durability.
Versatile Installation:	Suitable for installation in corridors, windows, and other strategic locations to maximize security coverage.

### Reliable Performance

Consistently provides reliable alerts even in extreme weather conditions, operating within a wide temperature range.

### Enhanced Security

The combination of sound and light alerts serves as a strong deterrent to potential intruders, boosting overall security effectiveness.

### Specification

Model Number:	XG-80S02
Housing:	ABS fireproof case
Rating Voltage:	12VDC
Rating Current:	300mA
Working Voltage:	9-15VDC
Sound Pressure:	$108\pm 3$ dB (at 30cm)
Flashlight:	Integrated visual alert
Application:	Outdoor installation
